

Claims

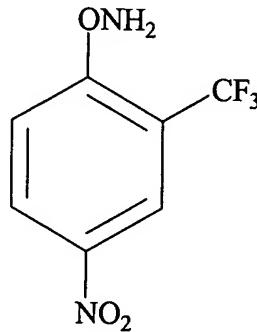

1. A compound of the formula

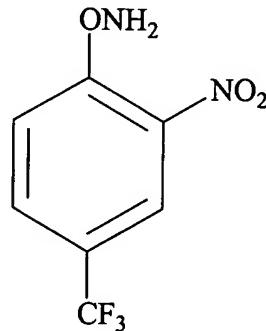

wherein one of A<sup>1</sup> and A<sup>2</sup> is NO<sub>2</sub> and the other is CF<sub>3</sub>, n=0-3 and R is halo, alkyl or CF<sub>3</sub>.

2. The compound of claim 1, wherein n=0.

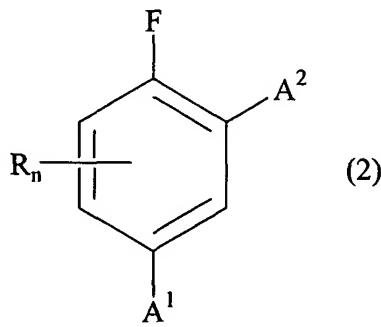

3. The compound of claim 2, which is

4. The compound of claim 2, which is

5. The compound of claim 1, wherein n=1.
6. The compound of claim 5, wherein R is ortho to ONH<sub>2</sub>.
7. The compound of claim 6, wherein R is CF<sub>3</sub>.
8. A method to amine a nitrogen in a recipient compound which method comprises treating said recipient compound with a compound of formula (1) under conditions wherein said amination can proceed.
9. The method of claim 8, wherein said conditions comprise the presence of base and an appropriate solvent.
10. The method of claim 8, wherein the recipient compound comprises indole.
11. A method to synthesize the compound of claim 1, which method comprises treating a compound of the formula

wherein A<sup>1</sup>, A<sup>2</sup>, R and n are as defined in claim 1 with an alkyl hydroxylacylamide or with Boc-hydroxylamine.
